

Dear 2021 Graduands,

Out of the same, some of you have communicated to us apprising that the Alphabets / Colour of the Photos, from your Degree Certificate has come peeling out, after you have pulled the Degree Certificates out of its Plastic Pocket of the Folder. Through this email, while we would request that in such cases the Degree Certificates be returned to us in Original, for further being taken up, we would also like to caution you, that keeping in mind , the ongoing rainy season, there is a possibility of some moisture creeping into the pockets of the Certificate, during transit, though each folder was individually plastic enveloped. In fact, this is the first time such a problem is coming to light. It is therefore not at all advisable to pull the Degree Certificate out of the pocket, in which it has been sent to you, at present. The Degree Certificate in its present folder pocket can be easily photocopied for your use, without being pulled out from the plastic pocket.

So all those, you have yet not attempted to pull it out from the Plastic pocket, may refrain from doing so.
